

 **THE NEW, EASIER WAY TO FIT OR REPAIR POLY PIPE!**

Guyco... evolution through innovation!

SAVE TIME AND MONEY USING JUST ONE FITTING!

The ultimate poly fitting has evolved... finally putting an end to frustration and guesswork with repairs and tricky installations! Now there's no need to dig back along the pipe when making a repair - you only need to expose the immediate area around the leak, tap in the inserts and slip the fitting over the pipe, then slide it back into position and tighten the nuts for a true slip-type connection.

With a full range of poly tees, BSP male tees and BSP male end connectors from 1" to 2", fitting, repairing and tapping into poly pipe has never been easier!
